File	Final_paper_kjns_210426 (1).pdf
Words	12,275
Sections Detected	preamble, introduction, methodology, experiments, discussion, section_vi, conclusions, section_vii, biogra
Review Mode	FAST
Model	qwen3:8b

■ **AI-ASSISTED REVIEW NOTICE:** This report was generated by an artificial intelligence system using Phi-3 Mini as the language model. It is intended as a supplementary tool to assist human peer reviewers. All findings must be validated by a qualified domain expert before editorial decisions are made. The AI may miss context-specific nuances and should not be used as the sole basis for acceptance or rejection.

Editorial Decision

MAJOR REVISION

Weighted Score: 3.4 / 5.0
Confidence: 61%

Evaluation Score Table

Scale: 0 = Not evaluable | 1 = Very weak | 2 = Weak | 3 = Acceptable | 4 = Good | 5 = Excellent

Criterion	Score	Rating	Visual
Originality & Novelty	4.0	Good	■■■■■

Detailed Agent Reviews

TitleAbstractKeywordsReviewer

Title, Abstract, Keywords

Score: 4.0 / 5.0 | Confidence: 65%

Strengths:

- [TITLE] Title detected and available for review.
- [ABSTRACT] Abstract detected and available for review.
- [KEYWORDS] Keywords detected and available for review.

StructureReviewer

Manuscript structure and logical coherence

Score: 4.2 / 5.0 | Confidence: 65%

Strengths:

- The manuscript follows a detectable progression: introduction -> methodology -> experiments -> discussion -> conclusions.
- The introduction appears to establish the problem/objective before the technical sections.
- The technical middle sections contain method/framework/model signals, supporting a methodological reading.
- Validation/results signals are present after the methodological material.
- The discussion appears to refer back to results, which supports structural coherence.
- A substantive conclusion section was detected.

MethodologyReviewer

Methodology, experimental design, equations — holistic review

Score: 2.5 / 5.0 | Confidence: 55%

Weaknesses:

- Could not parse model response — raw output stored

Recommendations:

- Re-run this agent or check model output

StatisticsReviewer

Statistical methods, tests, and reporting quality

Score: 3.5 / 5.0 | Confidence: 60%

Strengths:

- The manuscript reports multiple statistical validation elements, including independent runs, nonparametric tests, correction procedures, confidence intervals, and performance/dispersion metrics.

Weaknesses:

- Could not parse model response — raw output stored

Recommendations:

- Re-run this agent or check model output

FiguresTablesEquationsReviewer

Figures, tables, equations — quality and coherence with text

Score: 4.0 / 5.0 | Confidence: 62%

Strengths:

- 6 figure references were detected in the manuscript.
- 10 table references were detected in the manuscript.
- 52 sequentially numbered equations were detected, suggesting a substantial mathematical formulation.

Weaknesses:

- The model response could not be used reliably, so this fallback verifies presence and numbering but cannot judge visual quality or table body completeness.

Minor Comments:

- The model response could not be used reliably, so this fallback verifies presence and numbering but cannot judge visual quality or table body completeness.

Recommendations:

- Manually inspect captions, axes, units, table headers, and variable definitions in the final PDF.

ResultsReviewer

Results validity and empirical support

Score: **0.0 / 5.0** | Confidence: 0%

Weaknesses:

- Could not parse model response — raw output stored

Recommendations:

- Re-run this agent or check model output

DiscussionConclusionsReviewer

Discussion depth and conclusions validity

■ Skipped: Stopped by user before execution.

WritingReviewer

Scientific writing quality, clarity, and style

■ Skipped: Stopped by user before execution.

ReferencesReviewer

References quality, recency, and relevance

■ Skipped: Stopped by user before execution.

EthicsLimitationsReviewer

Research ethics, limitations, and transparency

■ Skipped: Stopped by user before execution.

Consolidated Minor Comments

These are suggestions that would improve the manuscript quality.

[1] The model response could not be used reliably, so this fallback verifies presence and numbering but cannot judge visual quality or table body completeness.

Specific Improvement Recommendations

1. Re-run this agent or check model output
2. Manually inspect captions, axes, units, table headers, and variable definitions in the final PDF.

This review was generated automatically by the Multi-Agent Paper Review System using Phi-3 Mini (Microsoft) running locally via Ollama. No manuscript content was transmitted to external servers. Rubrics based on Elsevier, IEEE, and Emerald Q1 peer review standards. This document does not constitute an official editorial decision.
